Open Source From research Labs to Enterprise IT

Patrick Moreau, head of open source strategy

OPEN WORLD FORUM

Why this track ?

- Software is a pervasive element in research
  - a large part is distributed with an open source license
- Integration of research results  Increase of competitiveness
- Open source  fluid transfer and innovation activities.
- The path from the publishing of open source research software to the publishing of commercial one
  - is a long maturation process
  - requires specific know-how.

OPEN WORLD FORUM

Who should attend?

- TTOs (Technology Transfer Officers)
- Software publishing companies CTOs and CEOs
  - who should be interested in this high-value software production.
- CIOs
  - who should also be interested in a better understanding of these issues.

OPEN WORLD FORUM

Thanks to

OPEN WORLD FORUM
