LIENS

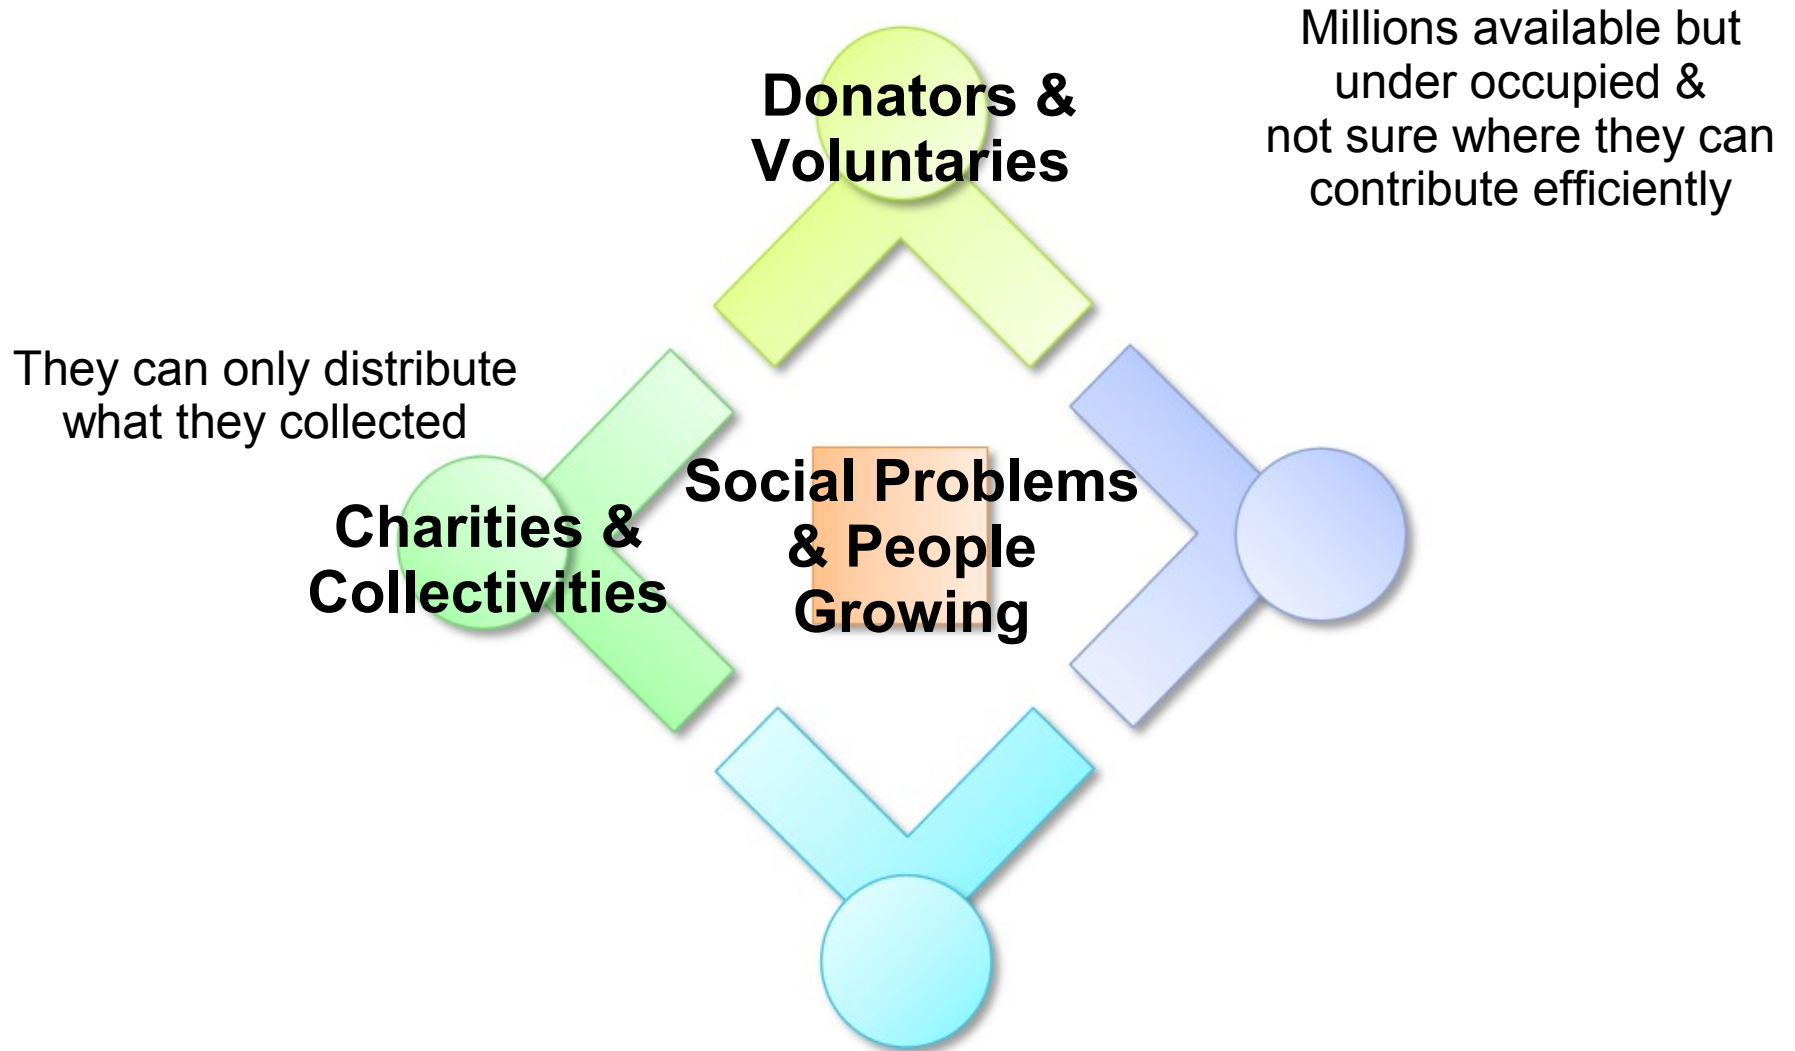

Technologies et Solidarités

Association Loi 1901 créée le 30 mars 2012

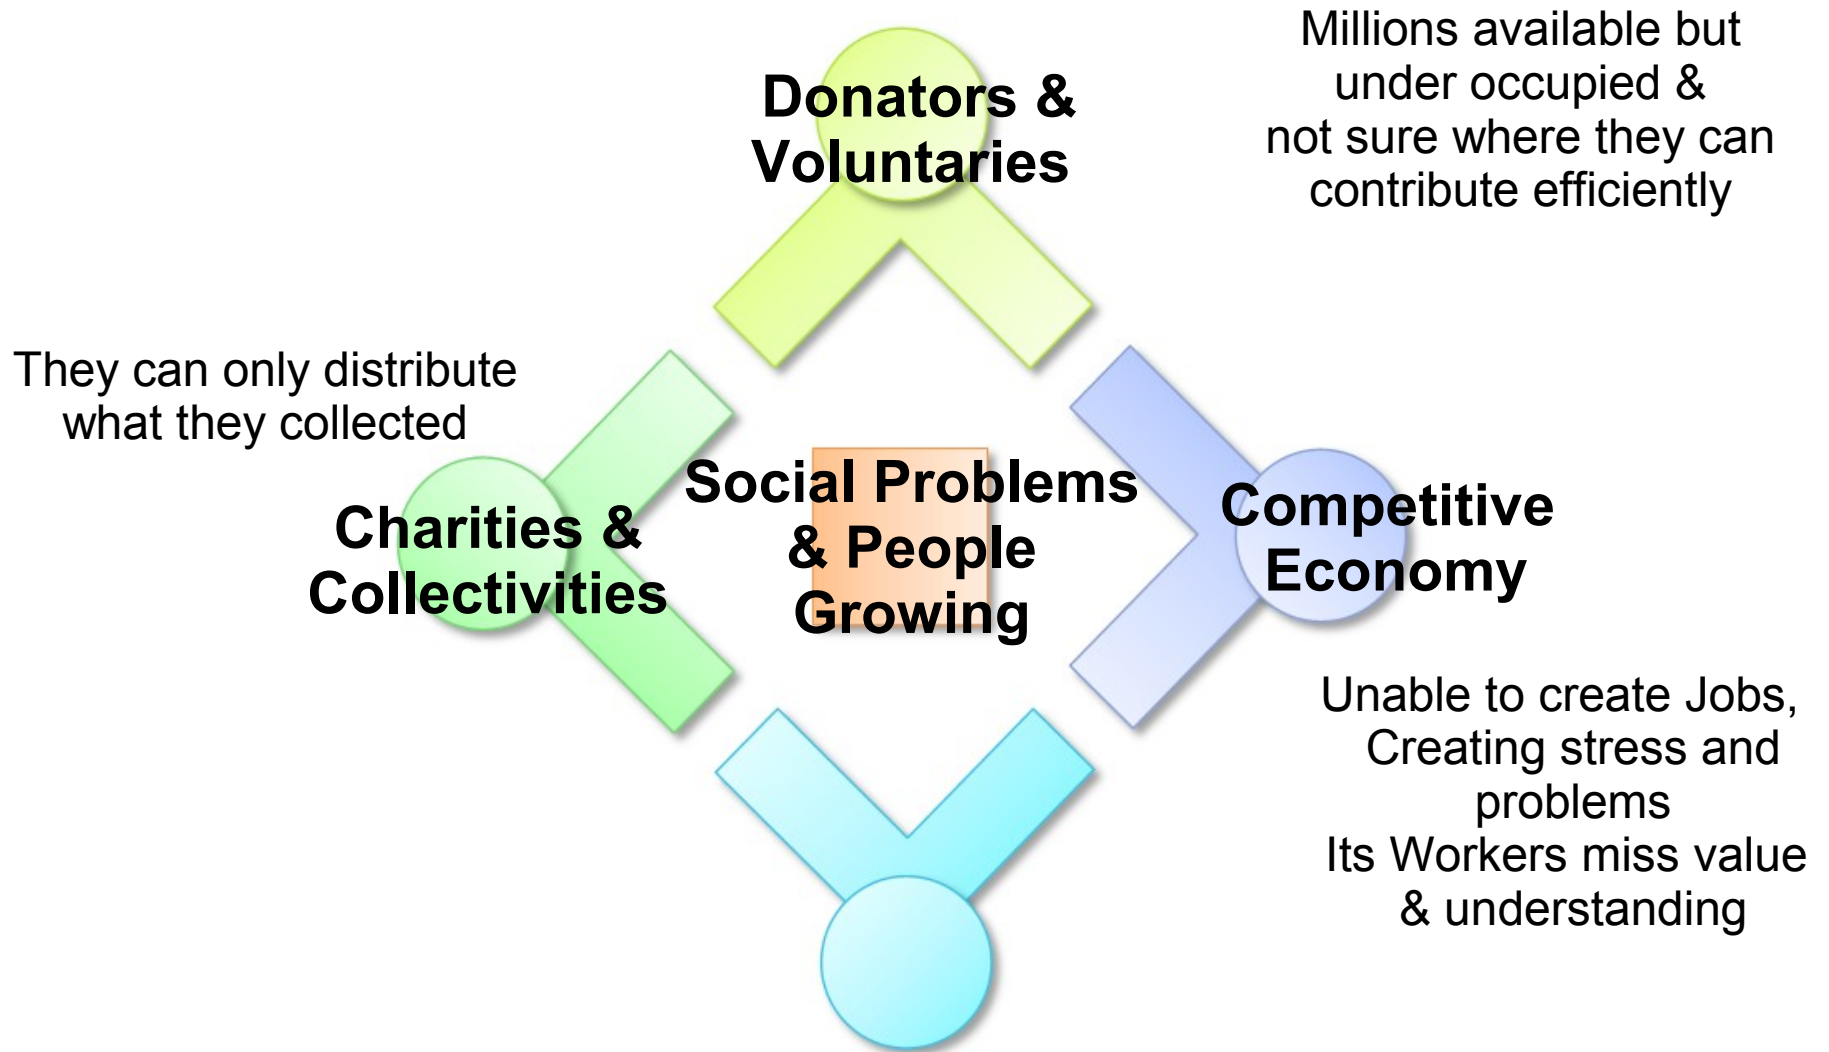

Problems & Pains

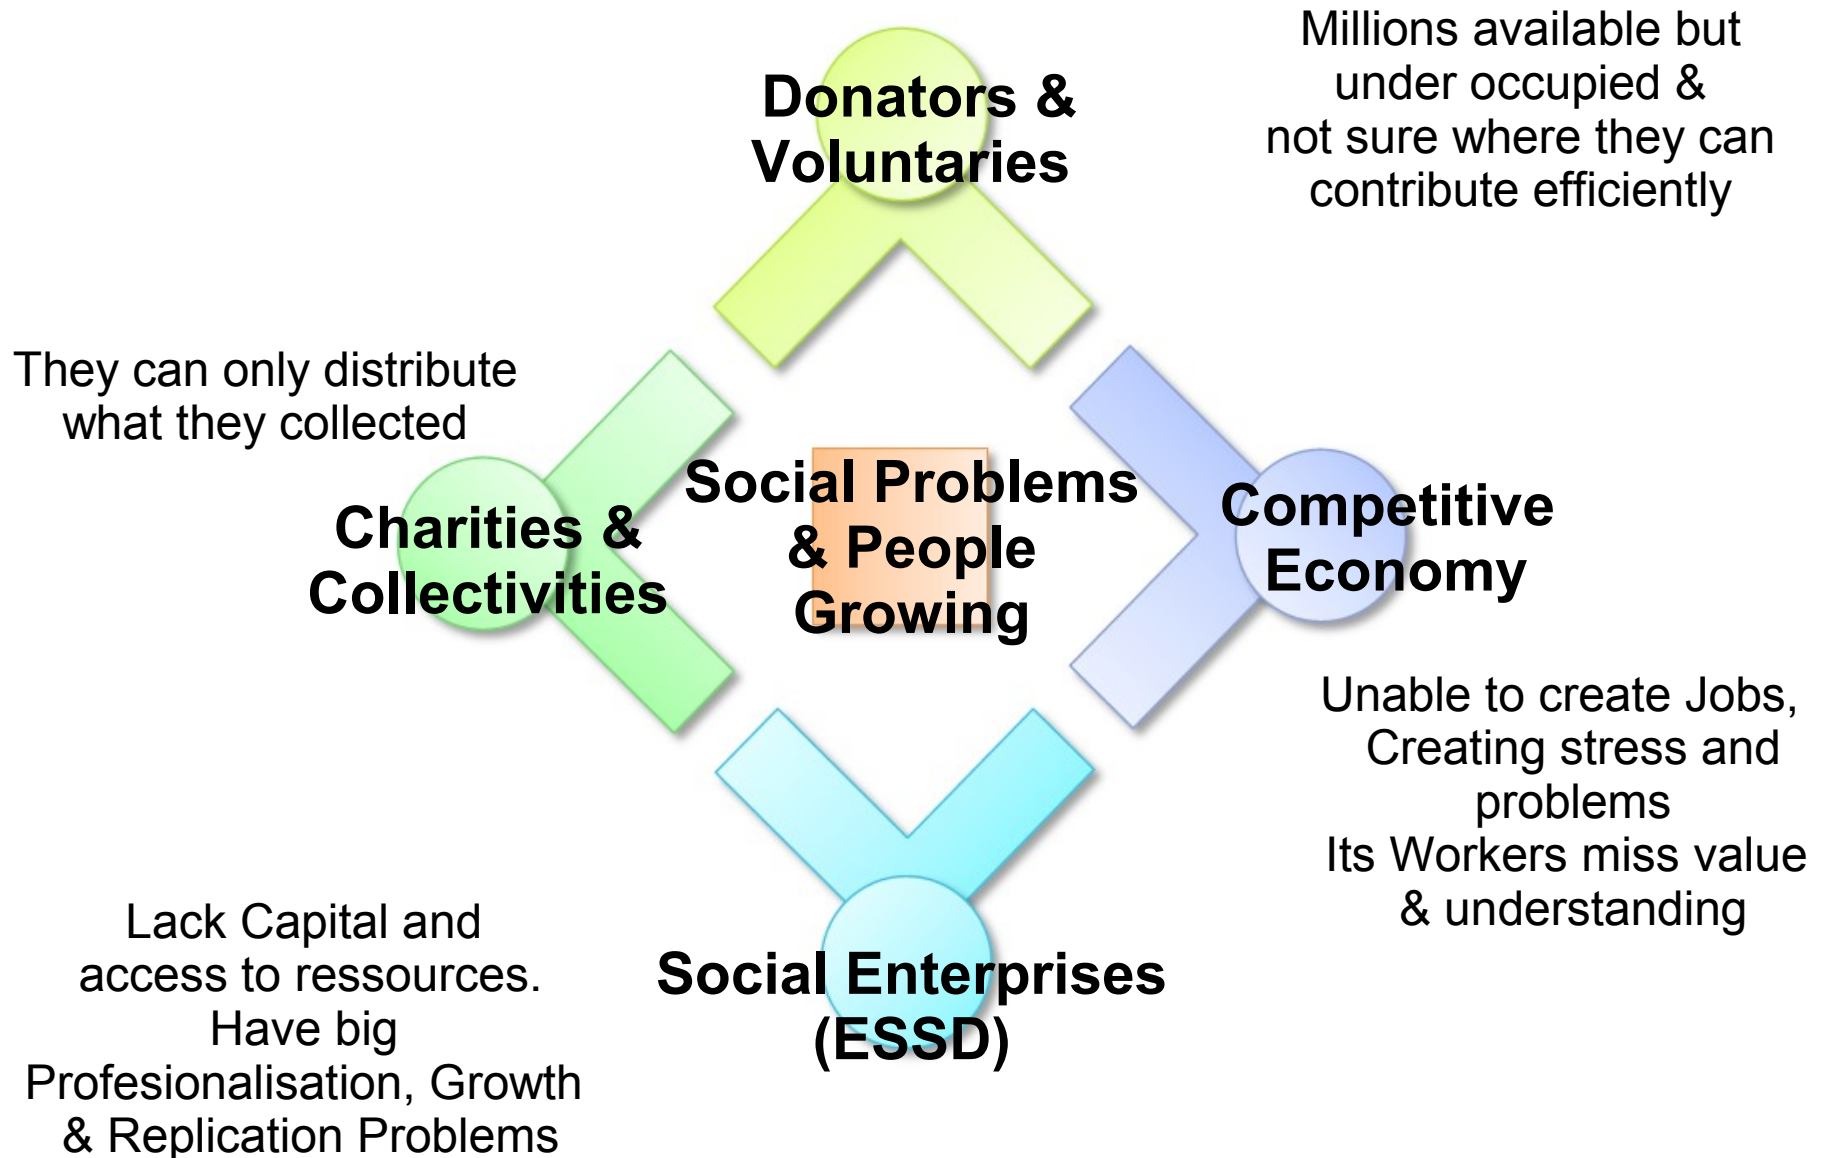

Problems & Pains

Problems & Pains

Problems & Pains

Problems & Pains

Globally the four sectors are stagnant and dont know how to understand each other and cooperate

Millions available but
under occupied &
not sure where they can
contribute efficiently

They can only distribute what they collected

Charities & Collectivities

Social Problems & People Growing

Competitive Economy

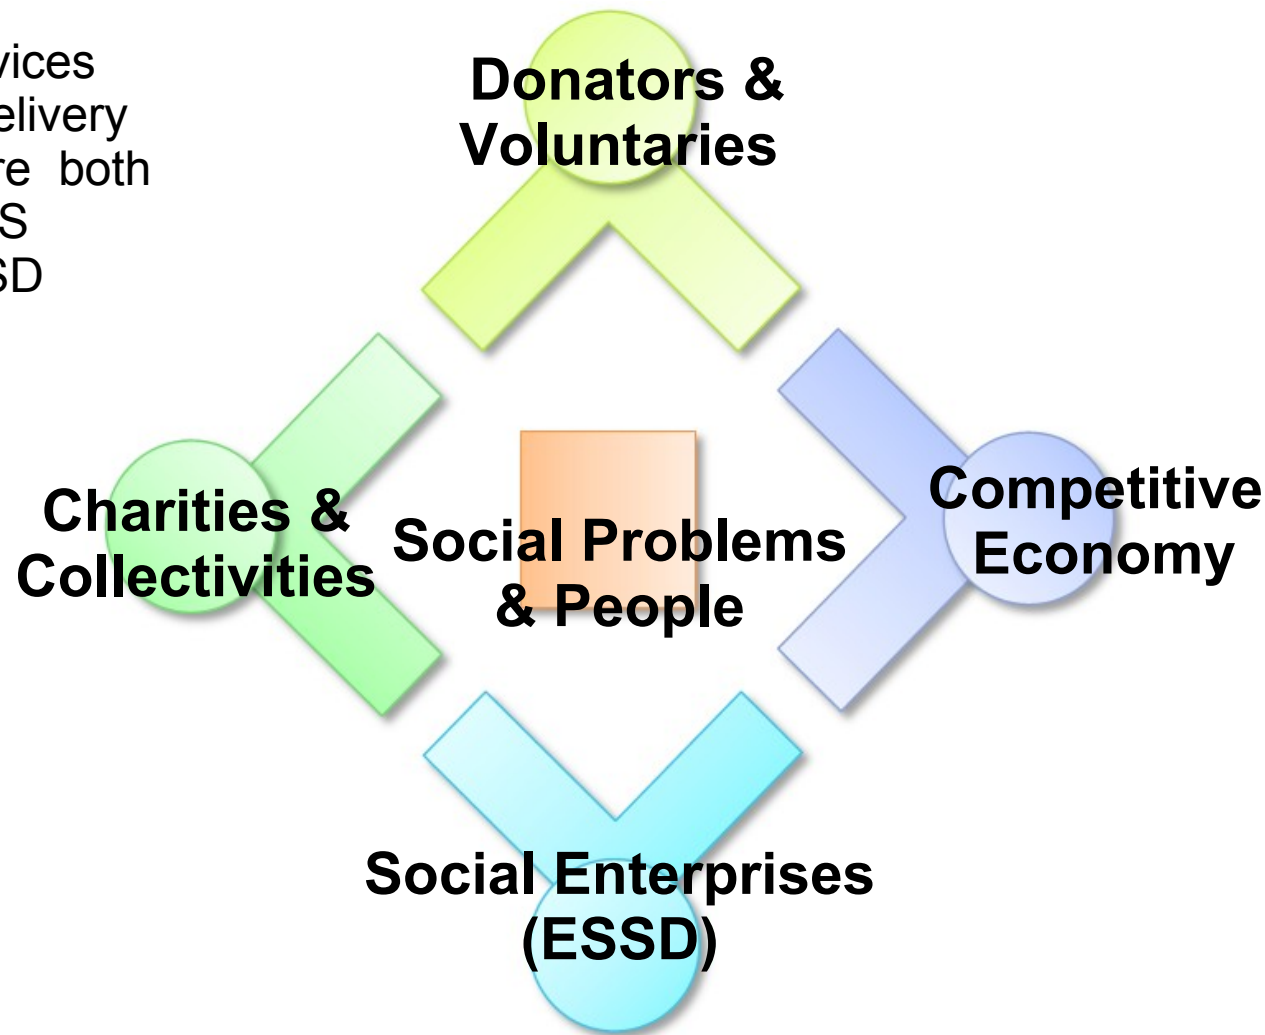

Unable to create Jobs,
Creating stress and
problems
Its Workers miss value
& understanding

Lack Capital and
access to resources.
Have big
Profesionalisation, Growth
& Replication Problems

Social Enterprises (ESSD)

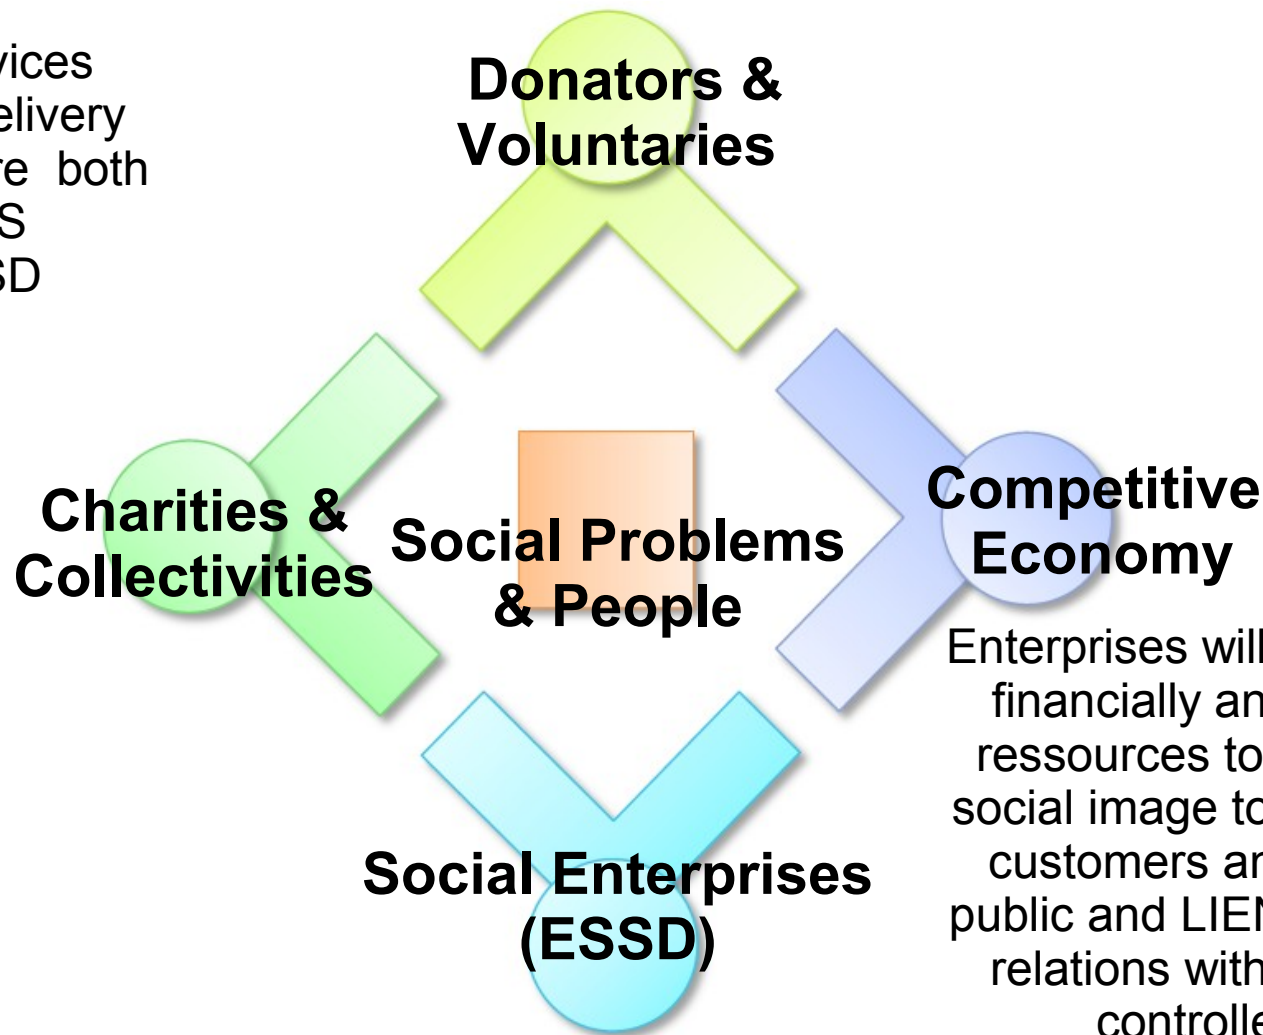

The Internet and the
personal terminal open
big opportunities to
increase contributors
cooperation and
efficiency
for Social Services
Production & Delivery
thanks to software both
inside LIENS
and for ESSD

LIENS 7 software packages

All software packages
will be open source and
built from existing open
source software
and tools

**Donators &
Voluntaries**

**Charities &
Collectivities**

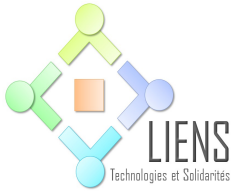

**Social Problems
& People**

**Competitive
Economy**

**Social Enterprises
(ESSD)**

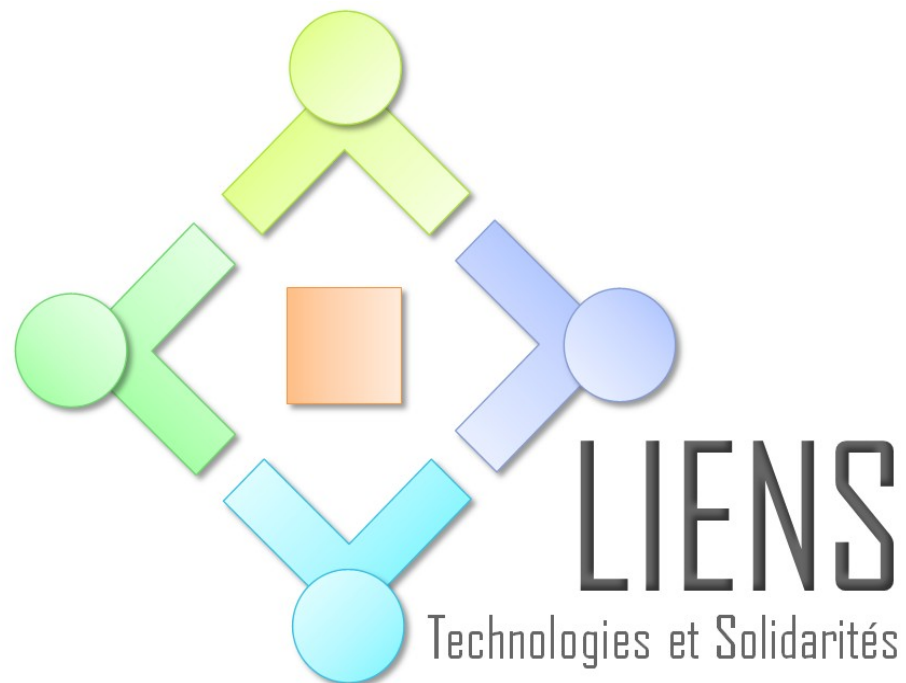

will be able to create jobs,
deliver adapted and missing
products and services, grow
and replicate

1. Tools to Collect problems, information and propositions from voluntaries, *(started with a 1st patroning software house)*
2. Tools to transcode and deliver useful information to actors
3. Tools for Analysis, Statistics and Presentation of the big data of millions of uploaded information
4. Tools to help Stimulate, and Animate Forums about social problems and solutions,
5. Tools to Collect and Channel ressources to projects and ESSD, and Giving smart Feedbacks
6. Tools to organize and animate ESSD social franchising as the best way to replicate successful ESSD
7. LIENS own internal software to organize work of expected members and contributors located all over France

Typical Benefits of a long term partnership with LIENS for a Software House

- ◆ Providing meaningful projects on which to work when a person is not in a customer project (5-15%),
- ◆ Providing real subjects on which to train on a particular technology (*Internet and mobiles for the coming years*)
- ◆ Attracting smart persons and reducing turn over thanks to the high level image of the software house,
- ◆ Creating a common project between all persons working in the software house, most interested persons working on it during their off hours,
- ◆ Getting a business and general public good image,
- ◆ And a few others,

OWF 2012
Friday 12nd of October

Thank you
for your attention
