

The Internet of Things & Services: Renaissance Re-Born

12 October 2012
Open World Forum, Paris
Hans-Jürgen Kugler

About Kugler Maag Cie:

We help *organisations* to develop, especially those in “**traditional industries**” whose products have been “infected by software.”

The Internet of Things and Services

– Renaissance Re-Born

- The Internet of Things and Services comes at the right time. Waves of open initiatives discover that community values harmonize with sustainable eco-systems. The Internet of Things and Services will connect these wave to a tide that will wash away some of the dogmatic relics of the industrial revolution.
- We are entering the creative age. Acceptance of diversity, trust, empowerment, empathy and a shared purpose are the foundations for healthy organizations, large or small. With the Internet of Things and Services we can really democratize the productive resources without "exclusion zones." We need help from all walks of life, from all disciplines. Together we can change society. The Second Renaissance has begun.

[<http://2renaissance.org>]

The Internet of Things and Services is more than ...

... technology ...

... innovation ...

... new industry ...

... third stage of industrial revolution ...

... end of industry ...

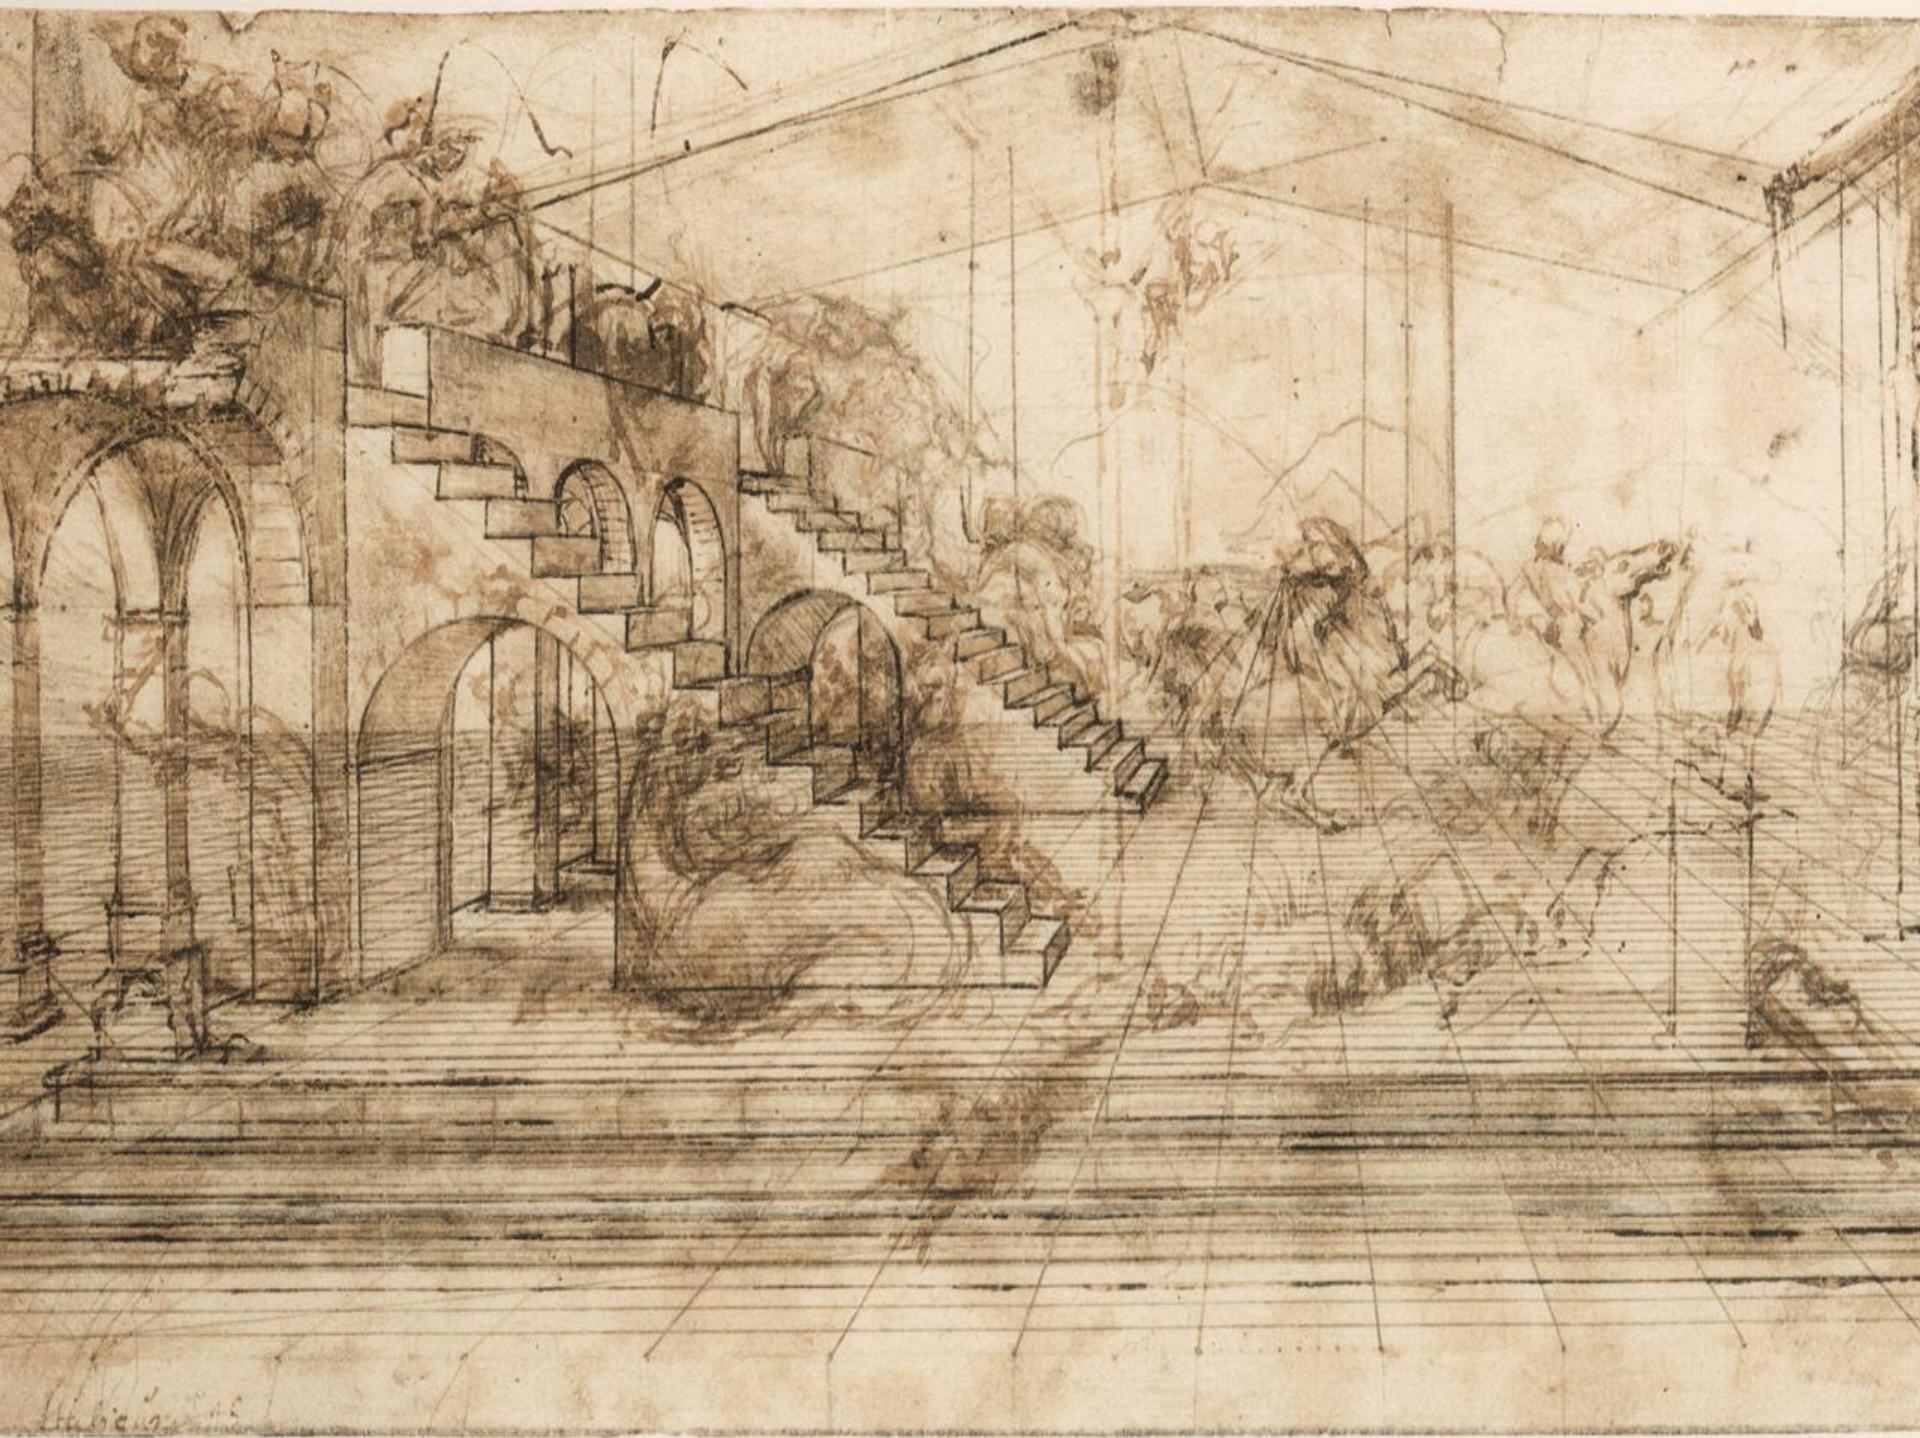

... if we want ...

A detail from Michelangelo's 'The Creation of Adam' fresco. It shows the muscular torso and arm of Adam on the left, reaching out towards the right. On the right, the hand of God is visible, partially hidden by a red robe. In the upper right corner, the face of God is partially visible, looking down at Adam. The background is a light, textured sky.

This happened before ...

... artists discovered a “new view”
